

Online Appendix. Dual Degree PharmD/MPH Program Survey

Introduction

The dual degree PharmD/MPH program is designed for students interested in working in careers within pharmacy with an emphasis on epidemiological based research, evaluation of community based health programs and needs of populations and issues affecting their health. With an MPH degree students will be provided with the expertise and competences essential to comprehend population based care, assess the effects of emerging health issues and policies on the current healthcare environment and provide care and services in order to promote the health and well-being of local and global communities.
